SUMMARY

B.Tech graduate in Artificial Intelligence and Machine Learning with strong Python skills and hands-on experience in LLMs, Hybrid RAG, AI Agents, LangGraph, and MCP. Built end-to-end Generative AI applications using vector databases, embeddings, prompt engineering, evaluation frameworks, and observability. Seeking an entry-level AI/LLM Engineer role to develop intelligent, scalable, and production-ready AI solutions.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)

Raghu Engineering College, Visakhapatnam

Jun 2026

CGPA: 8.23 / 10.0

Diploma in Computer Engineering

Sri YVS & Sri BRM Polytechnic, Mukteswaram

2023

73.75%

TECHNICAL SKILLS

Programming: Python, Java, SQL

Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents

LLM Frameworks: LangChain, LangGraph, Model Context Protocol (MCP)

Vector Search: ChromaDB, Sentence Transformers, BM25 Retrieval, Embedding Models

Machine Learning: Scikit-learn, Pandas, NumPy, NLP

Deployment: FastAPI, Streamlit, REST APIs

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

Novetum Enterprise LLM & Agent Platform | Python, LangGraph, FastAPI, ChromaDB, MCP | 🐙 GitHub

- Built a **multi-agent AI platform** using LangGraph with Planner, Researcher, Writer, and Critic agents for multi-step reasoning.
- Developed a **Hybrid RAG pipeline** using chunking, embeddings, ChromaDB, dense vector search, and BM25 reranking.
- Integrated **MCP** tools and prompt engineering to extend LLM capabilities with external knowledge.
- Implemented evaluation and observability by tracking latency, token usage, execution traces, and response quality.
- Designed a modular AI workflow integrating LLMs, retrieval, tools, and reasoning to deliver reliable enterprise-grade AI solutions.

Healthcare AI Assistant | Python, Transformers, NLP, FastAPI | 🐙 GitHub

- Built an AI healthcare assistant for symptom, medication, diagnosis, and appointment-related queries.
- Implemented intent classification and **Named Entity Recognition (NER)** for clinical text processing.
- Developed REST APIs using FastAPI for seamless healthcare application integration.
- Improved response accuracy through prompt engineering and structured medical context.
- Integrated Hugging Face transformer models to provide context-aware healthcare responses with improved user experience.

INTERNSHIP

AI/ML Intern

Skill Dzure (AICTE Certified), Hyderabad

May 2025

Jun 2025

- Trained supervised and unsupervised ML models end-to-end; improved model **F1-score by 12%** through preprocessing.
- Applied **PCA** and feature selection, cutting training time by **30%** with zero accuracy loss.
- Performed data cleaning, handling missing values and outliers to improve dataset quality.

ACHIEVEMENTS & CERTIFICATIONS

LeetCode: Solved **190+** problems earned *50 Days Badge 2025* and *August Badge 2025*.

AI/ML Internship (AICTE Certified, SkillDzure).

Generative AI Virtual Experience Program (Forage).
