SUMMARY

B.Tech graduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in Python, Machine Learning, NLP, and Data Analysis through projects and internship. Passionate about building data-driven solutions and seeking an entry-level Data Science role to apply analytical and AI skills while contributing to impactful business outcomes.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)

Raghu Engineering College, Visakhapatnam

Jun 2026

Diploma in Computer Engineering

Sri YVS & Sri BRM Polytechnic, Mukteswaram

CGPA: 8.23 / 10.0

2023

73.75%

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, R

Machine Learning & AI: Machine Learning, Deep Learning, Natural Language Processing (NLP)

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow/Keras, PyTorch, OpenCV

Cloud & DevOps: AWS, Azure, OCI, Google Cloud Platform (GCP), Docker, Kubernetes, DevOps

Web & Deployment: Flask, Streamlit, Django, REST APIs, HTML, CSS, JavaScript, React Js

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, PyCharm

PROJECTS

AI Guard Detection | *PyTorch, Mask2Former, Streamlit, ZenML, W&B* | GitHub

- Fine-tuned **Mask2Former** transformer for instance segmentation of 5 railway defect classes; deployed Streamlit web app for real-time visualization.
- Built **ZenML** pipeline with MobileNetV2 two-stage training; tracked experiments with **Weights & Biases** logging mIoU and loss metrics.
- Implemented YOLO-format polygon label parsing and OpenCV-based segmentation mask rendering with per-class confidence scores.
- Designed modular src layout with pipelines, steps, and training modules; managed codebase with Git and GitHub.

Fraud Detection System | *Python, Random Forest, scikit-learn, SMOTE* | GitHub

- Trained multi-model pipeline on **100K+ records**; applied **SMOTE** to boost minority-class recall from 54% to 91%.
- Evaluated models with ROC-AUC, F1-score, and 5-fold cross-validation; conducted thorough EDA.
- Implemented **NLP-based anomaly detection** on transaction descriptions to identify suspicious patterns.
- Optimized pipeline with **parallel processing**, reducing training time by 25%.
- Deployed prototype using **Streamlit dashboard**, enabling interactive fraud case analysis for end-users.
- Explored integration with **cybersecurity frameworks** to strengthen fraud prevention strategies.

Healthcare NLP Assistant | *Python, HuggingFace Transformers, spaCy, Flask*

- Developed an **NLP chatbot** to process patient queries and medical records using BERT-based text classification.
- Implemented **Named Entity Recognition (NER)** for extracting symptoms, medications, and diagnoses.
- Built REST API with Flask for integration into healthcare applications.
- Achieved 87% accuracy in intent classification across 10 healthcare-related categories.

INTERNSHIP

AI/ML Intern

Skill Dzure (AICTE Certified), Hyderabad

May 2025

Jun 2025

- Trained supervised and unsupervised ML models end-to-end; improved model **F1-score by 12%** through preprocessing.
- Applied **PCA** and feature selection, cutting training time by **30%** with zero accuracy loss.
- Performed data cleaning, handling missing values and outliers to improve dataset quality.

ACHIEVEMENTS & CERTIFICATIONS

LeetCode: Solved **160+ problems** earned *50 Days Badge 2025* and *August Badge 2025*.

AI/ML Internship (AICTE Certified, SkillDzure).

Generative AI Virtual Experience Program (Forage).
